

**Let the staff at The
NeuroSensory Center
help improve the
quality of life for you
or your child.**

**We provide assessment
and treatment that is:**

- Safe**
- Non-invasive**
- Effective**
- Science-Based**

From a Physical Therapist ...

"I wanted to let you know...that I am seeing improvements in all the children on my caseload that have started their treatment program after being evaluated at your center. In general, the children are much more regulated, they can tolerate more sensory input (visual, auditory, vestibular) without becoming overwhelmed and stressed. In addition, the children are more playful and more interested in engaging with others (parents, peers, siblings) and initiating more purposeful activities without prompting. I am seeing increases in eye contact, language, both expressive and receptive, and communicative intent across the board."

From a parent of a child with autism...

".....after being disappointed again by another Dr. who does not believe there is anything you can do for an autistic child, I am deeply thankful to you, all the staff, and Dr. Becker for seeing my son so early and for starting such great treatment. I would hate to think where we would be now and how much precious time we would have lost if not for all of you."

From a patient with migraine headaches...

"I have suffered with migraines for at least eight years, and it was to the point of them controlling my life. I came upon information about the NeuroSensory Center, and made an appointment. It has been one of the best experiences within the medical field that I have had. For the first time, I felt that someone was actually listening to me. A combination of (psycho)therapy, dietary changes, biofeedback, and positive support seems to have significantly decreased my migraines. I feel healthier today than I have felt in years."

The NeuroSensory Center of Eastern Pennsylvania

**Specializing in you and
your family's health.**

**Safe and effective
treatment for a variety of
adult and child physical,
cognitive, and behavioral
disorders.**

“Cutting-Edge” Treatments for Neurosensory Disorders

The NeuroSensory Center of Eastern Pennsylvania is a specialty facility designed to diagnose and treat even the most complicated disorders of the nervous system. Our Center is staffed by certified Neurosensory Specialists, DAN! Clinicians, Nurses, Therapists, and Psychologists, and is equipped with the **Sensory View Diagnostic System** — a state of the art diagnostic system. These are non-invasive, FDA-approved tests that allow our clinicians to “see” the source of your problem. The findings are presented in an easy to understand graphical analysis. Once the source of your problem is identified, a customized treatment plan can be presented based on objective test results.

We evaluate and treat the following conditions:

- AUTISM / ASPERGERS DISORDER
- ADD / ADHD / LD
- DIZZINESS / IMBALANCE / VERTIGO
- LEARNING / SENSORY DISORDERS
- MIGRAINES / HEADACHES
- VISION ABNORMALITIES
- MOVEMENT DISORDERS

Quick Facts About Neurosensory Disorders

Headaches/Migraines

- 1 in 5 adults suffer from chronic/recurrent headaches
- Migraines support a \$5 billion per year pharmaceutical industry
- 4th most common reason for young females (18-35) to see a physician

Autistic Spectrum/ADHD/Learning Disorders

- 25% of school age children are diagnosed with one of these disorders
- 90% fall into the category of “academic underachievers”
- 1 in 90 children in the United States has an autism spectrum disorder

Concussion/Head Injury

- Affects almost 1/2 million young adults per year
- Athletes who suffer 2 or more concussions will be affected by chronic cognitive symptoms
- 1.3 million Americans per year will be diagnosed with “post concussion syndrome”.

Functional Vision Disorders

- 80% of children who are reading disabled have a vision functioning deficiency
- American Optometric Association states that 1 in 4 children suffer from vision deficiency in near point tasks.

Dizziness/Imbalance

- Second only to chronic back pain as reason for a doctor’s visit
- 60 million Americans complain of dizziness/imbalance at least once in their lives
- Patients with chronic dizziness visit an average of 5 doctors seeking help
- Falls are the leading cause of death in persons over 65 years of age

How do I make arrangements to come to the Center?

Making an appointment to be seen at The NeuroSensory Center is easy. Just call 570.763.0054 and speak with one of our friendly and helpful staff members. We accept many insurance plans.

We are conveniently located on Pierce Street in downtown Kingston, PA. Ample parking and handicap-accessibility are provided.

Your appointment will include both evaluation and treatment by our doctors, using our patented Sensory View Diagnostic System. We welcome the opportunity to help improve the quality of life for you and your family.
